SELF-ASSESSMENT TOOL

INTERACTIVE ASSESSMENT

AI Ready Leader Strengths & Opportunities Fi

Rate your organization honestly across seven domains. Tailored recommendations appear in real time on the right as you complete ea

Instructions

Based on current reality, rate each statement on a scale of 1 to 5. Answer based on your **current reality**, not where you want t

- **1** Not in place
- **2** Limited / inconsistent
- **3** Partially in place
- **4** Mostly place

FOCUS AND VALUE

1 Business Alignment & Use-Case Focus

Ensure AI efforts are anchored to a single, leadership-aligned business priority by to a clearly owned, outcome-driven use case.

1. We have identified the highest-impact business outcome to improve across the end-to-end subscriber journey that AI should address first.

2. Leadership has selected a single priority AI initiative/use case and ca it, and how success will be measured.

3. AI efforts are treated as business initiatives tied to measurable outc
decision to scale, iterate, or stop.

2 Value Measurement & Outcomes

Confirm the organization can define meaningful outcome metrics, review AI impac
or stop AI initiatives.

4. For the priority AI initiative, we have defined outcome metrics that t
(not just activity or output metrics).

5. We track impact in a way that enables leadership decisions (continu
credibly across stakeholders.

6. We have an operating cadence to review outcomes, exceptions, and
improve the workflow over time.

TRUST & GOVERNANCE

3 Data Foundation, Trust & Enrichment

Assess whether the organization has accessible, well-owned data and knowledge

7. We know which data and knowledge sources are required for the pri
organization.

8. Core data/knowledge sources are accessible in the environments wh
boundaries.

9. We have clear ownership and a lightweight knowledge/data enrichm
standards) to sustain trust as AI usage scales.

4 Governance & Ownership

Establish clear leadership accountability for AI-influenced decisions by defining hu
responsibly at scale.

10. Named leaders own AI-influenced decisions end-to-end, and accou
recommended."

11. Human-in-the-loop rules are defined (what AI may recommend/trig
are escalated).

12. AI operations are traceable and auditable (we can review inputs, d
needed).

5 Operating Model, Decision Systems & Scalabi

Determine whether the organization has a clear operating model for AI; defining w
production.

13. We have decided where AI will "live" (trusted SaaS, data/analytics
governance intensity to that risk level.

14. Our operating model explicitly defines four roles for AI workflows: a
governance lead.

15. We can move from pilot to production with repeatable patterns (se
than one-off implementations.

ADOPTION & SUSTAINED CHANGE

6 Workforce Readiness & Adoption

Evaluate whether employees and managers are prepared to adopt AI in real workf
confidence over time.

16. Employees understand how AI assists their role and have practical
just awareness training).

17. Managers are equipped to lead adoption: addressing resistance wit
changes workflows.

18. We have an enablement approach matched to personas/roles (mic
resources) and we track progress.

7 Change, Culture & Responsible Scaling

Measure the organization's ability to lead AI as a sustained change initiative by fo
trust before scaling automation.

19. We have a clear change plan with coalition/champion support and
reinforces "why," progress, and expectations.

20. Teams feel safe surfacing concerns and exceptions, and leaders tre
systems (not as blame).

21. We pace adoption deliberately ("go slow to go fast"), increasing au
mature.
